

8-Week Personalized Trading Training

Mastery, not mimicry.

A bespoke mentorship experience built entirely around your
goals, risk tolerance, and psychology.

The Ultimate Financial Life Hack

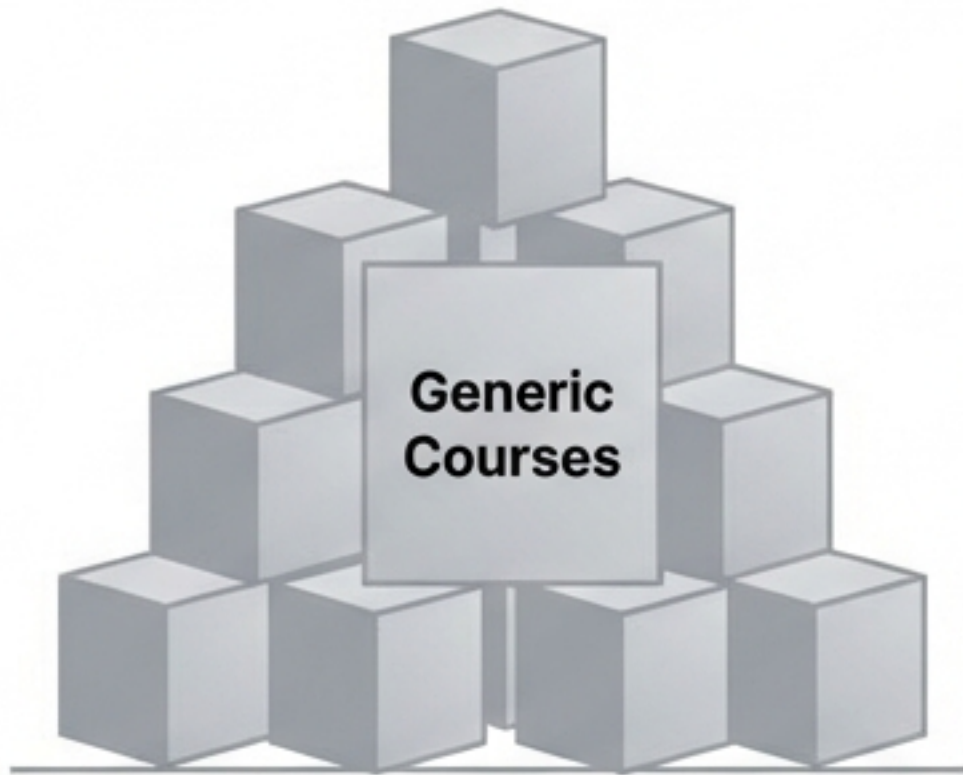

Technical analysis is not just about reading charts; it is about decoding the language of money. It is the specific skill set required to reclaim your time and achieve financial freedom.

This is a transformational tool that allows you to engineer your own financial outcomes rather than relying on luck or general market sentiment.

Stop Buying Cookie-Cutter Courses

Generic advice fails because it ignores the variable that matters most: YOU.

Standard courses deliver a fixed curriculum.

They don't account for your specific risk tolerance or psychological triggers.

They teach you to mimic, not to master.

Not another generic course. This is custom-built for you.

100% Built Around You

This is not a pre-recorded video library.
It is a live, interactive mentorship.

Discovery Call

We discuss your background, goals, and experience level before Week 1.

Custom Roadmap

I create a personalized 8-week curriculum based on exactly what YOU need to learn.

Weekly Sessions

30-minute 1:1 Zoom calls focused entirely on YOUR questions, YOUR positions, and YOUR progress.

The Methodology

Weeks 1-2

Assessment

Assess your current skill level and build your foundation.

Weeks 3-4

Strategy Dev

Develop your personalized leverage strategy based on your risk profile.

Weeks 5-6

Live Review

Real-time analysis of YOUR trades and decision-making.

Weeks 7-8

Advanced Tactics

Tactics tailored to your style + finalizing your ongoing Trading Plan.

The Architect Behind the Plan

Credentials

- **Crypto hedge fund** co-founder.
- Former **IBM blockchain architect**.
- **14,000+ hours** studying markets and legendary traders.

Influences

Methodology draws from **Jesse Livermore**, **Nicolas Darvas**, **Stan Weinstein**, and **Mark Minervini**—combining their pattern recognition with modern execution.

Leverage Fundamentals

Best for beginners or those wanting a solid foundation.

- Understanding Bull vs. Bear ETFs.
- The critical math behind 2x and 3x leverage.
- Mastering the 'Daily Reset' and compounding effects.

Why: To ensure you understand the mechanics before you risk capital.

Technical Precision

Best for those wanting to read the market like a pro.

- Deep dive into Elliott Wave Theory across multiple time frames.
- Using Fibonacci retracement and extension levels to identify high-probability entries.
- Identifying targets with mathematical precision.

Scanner & Strategy

Best for self-directed traders.

- Building custom TradingView scanners together.
- Developing entry signals and exit strategies that match YOUR style.
- Moving from manual watching to automated filtering.

Potential Module D

Risk Management

Non-Negotiable Protection.

Essential for all active traders.

- Position sizing appropriately for 2x and 3x products.
- Stop Loss Strategies: 3-5% for 2x products, 5-7% for 3x products.
- Understanding volatility decay and when NOT to trade.

**A 3x ETF can lose 50%+ in volatile markets;
we teach you how to survive.**

Live Execution

Best for active traders wanting real-time feedback.

- Bring YOUR positions to the call.
- Real-time feedback on your entries, exits, and decision-making process.
- Turning 'theory' into an actionable improvement plan.

Who Is This For?

Perfect For

- ✓ **Active Day Traders:** Wanting to maximize returns on directional moves (1-3 days).
- ✓ **Swing Traders:** Holding for days/weeks using leverage to amplify edge.
- ✓ **Portfolio Hedgers:** Protecting long-term holdings without selling core positions.
- ✓ **Experienced Traders:** Adding leveraged products to the toolkit.

NOT For

- ✗ Passive buy-and-hold investors.
- ✗ **Beginners** who haven't mastered basic technical analysis.
- ✗ Anyone unwilling to monitor positions daily.

The Transformation

From

Guessing.

A Generic Plan.

Anxiety about volatility.

To

Executing with precision.

YOUR Personalized Trading Plan.

Confidence in risk parameters.

Result: By Week 8, you possess a complete trading plan built specifically around your risk tolerance.

The Investment

\$997

(One-Time Payment)

- ✓ Discovery Call (Pre-Week 1)
- ✓ 8 Weekly 1:1 Zoom Sessions (30 mins)
- ✓ Lifetime Access to Session Recordings
- ✓ Personalized Trading Plan Development

Fast-track 14,000+ hours of experience into an 8-week bespoke roadmap.

Your Roadmap Awaits
