UNDERSTANDING LEVERAGE MECHANICS

- **The Daily Reset:** Leverage resets every 24 hours.
- **The Math:** A 3x ETF amplifies daily moves, not long-term returns.
- **Volatility Decay:** In sideways markets, leverage erodes value.

PRO TIP

These are **short-term trading instruments**. A 3x ETF can lose 50%+ in volatile sideways markets. **Never buy and hold long-term.**

THE MARKET LEADER BLUEPRINT

The **6-Step** Checklist for High-Probability Entries

- 01 Exceptional Relative Strength**
Stocks already up 70%+ from 52-week lows.
- 02 Clean Structures**
Flags, VCPs, and compact bases. No messy price action.
- 03 Volume Accumulation**
Multiple up-days on 1.5–2x average volume (Institutional Footprints).
- 04 Fundamental Growth**
EPS +50%, Sales +20% YoY. Growth attracts capital.
- 05 Active Market Themes**
AI infrastructure, crypto miners, space. Momentum needs a story.
- 06 Asymmetric Risk/Reward**
Realistic +50–100% upside with clearly defined risk.

“Leaders move early. Late entries get punished.”

SCANNER MASTERY: MOMENTUM & BREAKOUTS

Scanner 1: Momentum Breakout

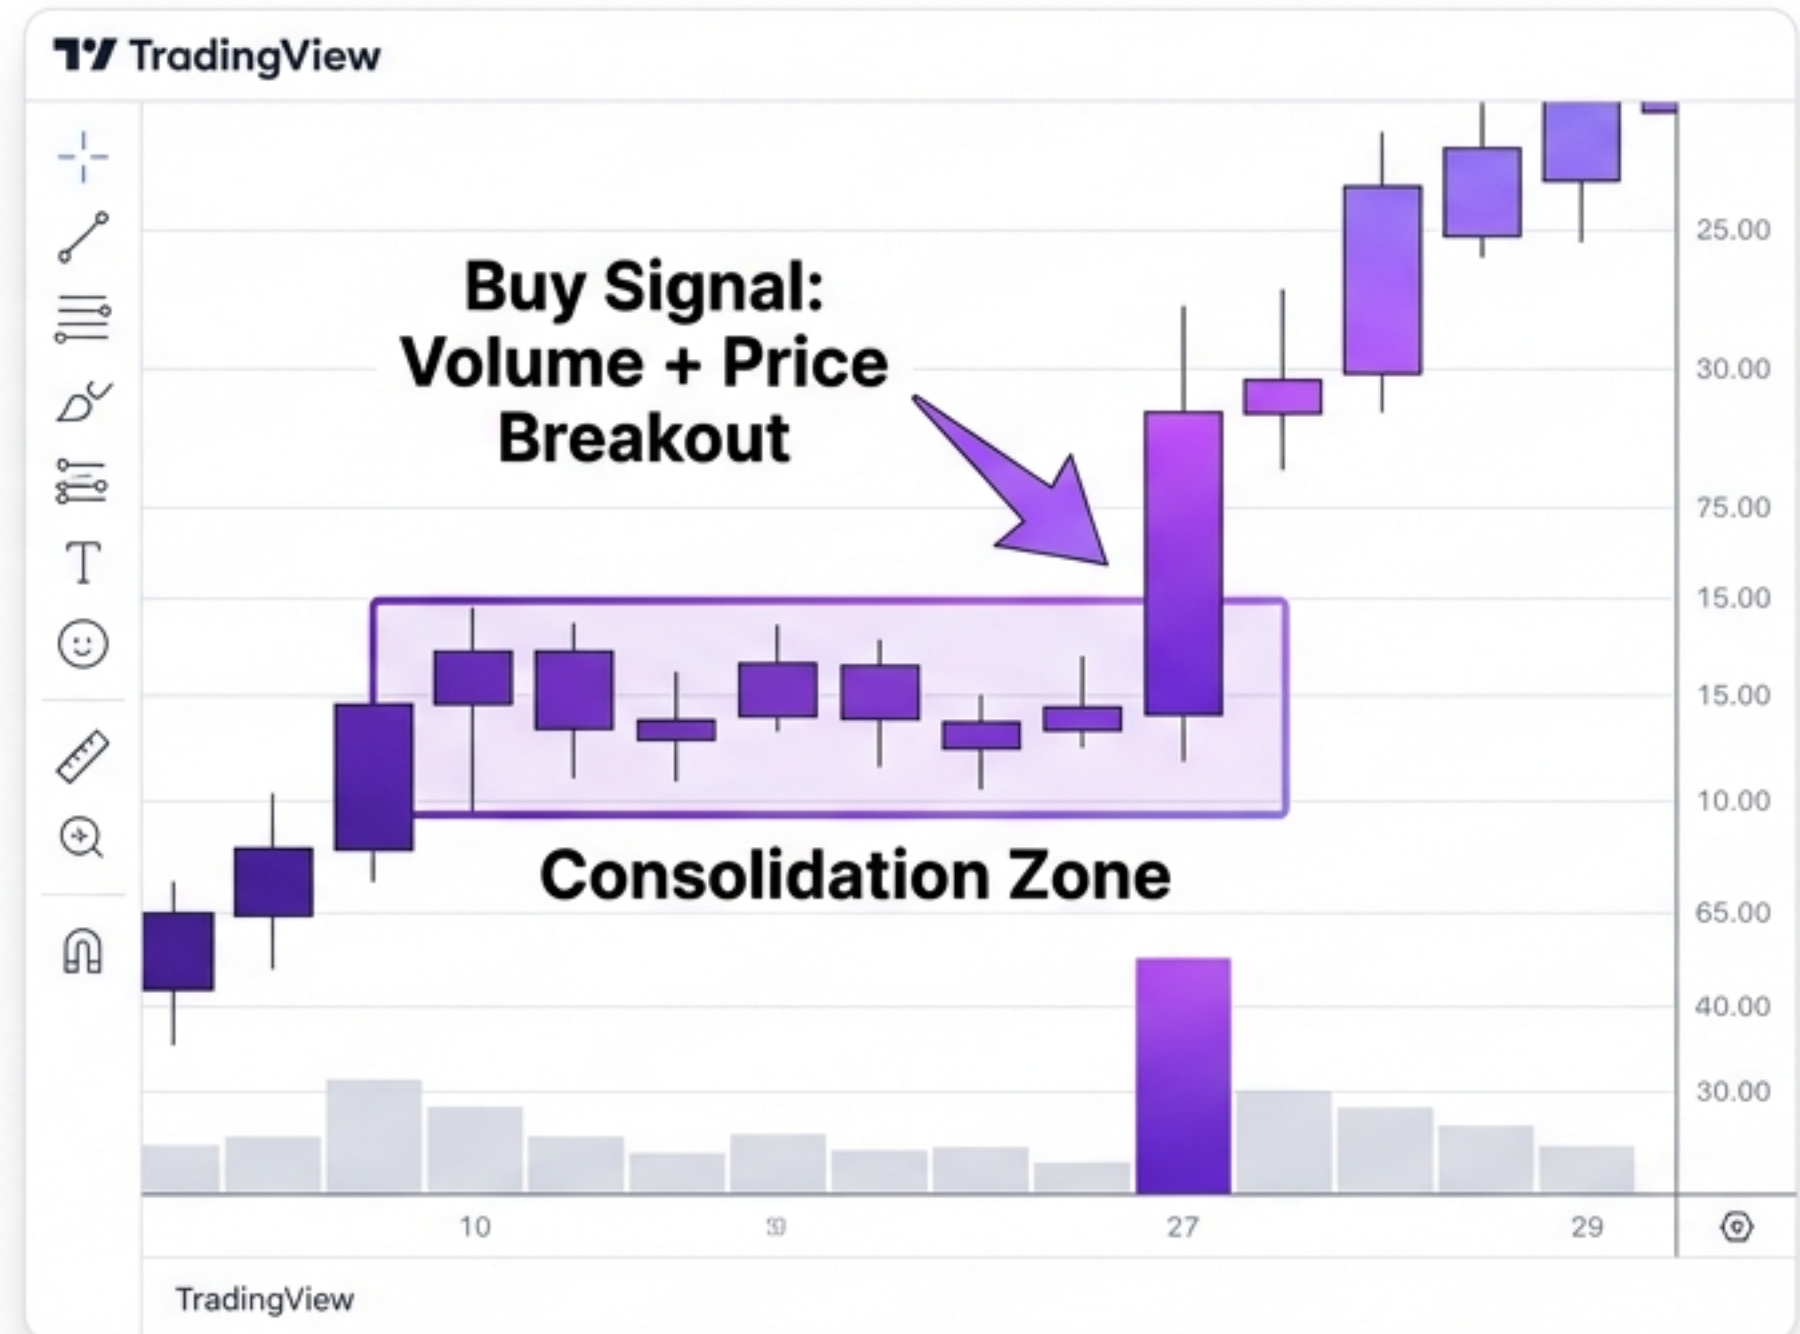

Finds leveraged bull ETFs breaking out with strong momentum above key moving averages.

Scanner 4: Gap Up Follow-Through

Catches continuation moves after significant gap-up openings.

Included Details:

- Exact filter criteria & values
- Recommended tickers to watch
- Entry signal explanations

SCANNER MASTERY: MEAN REVERSION

Scanner 2: Oversold Bounce

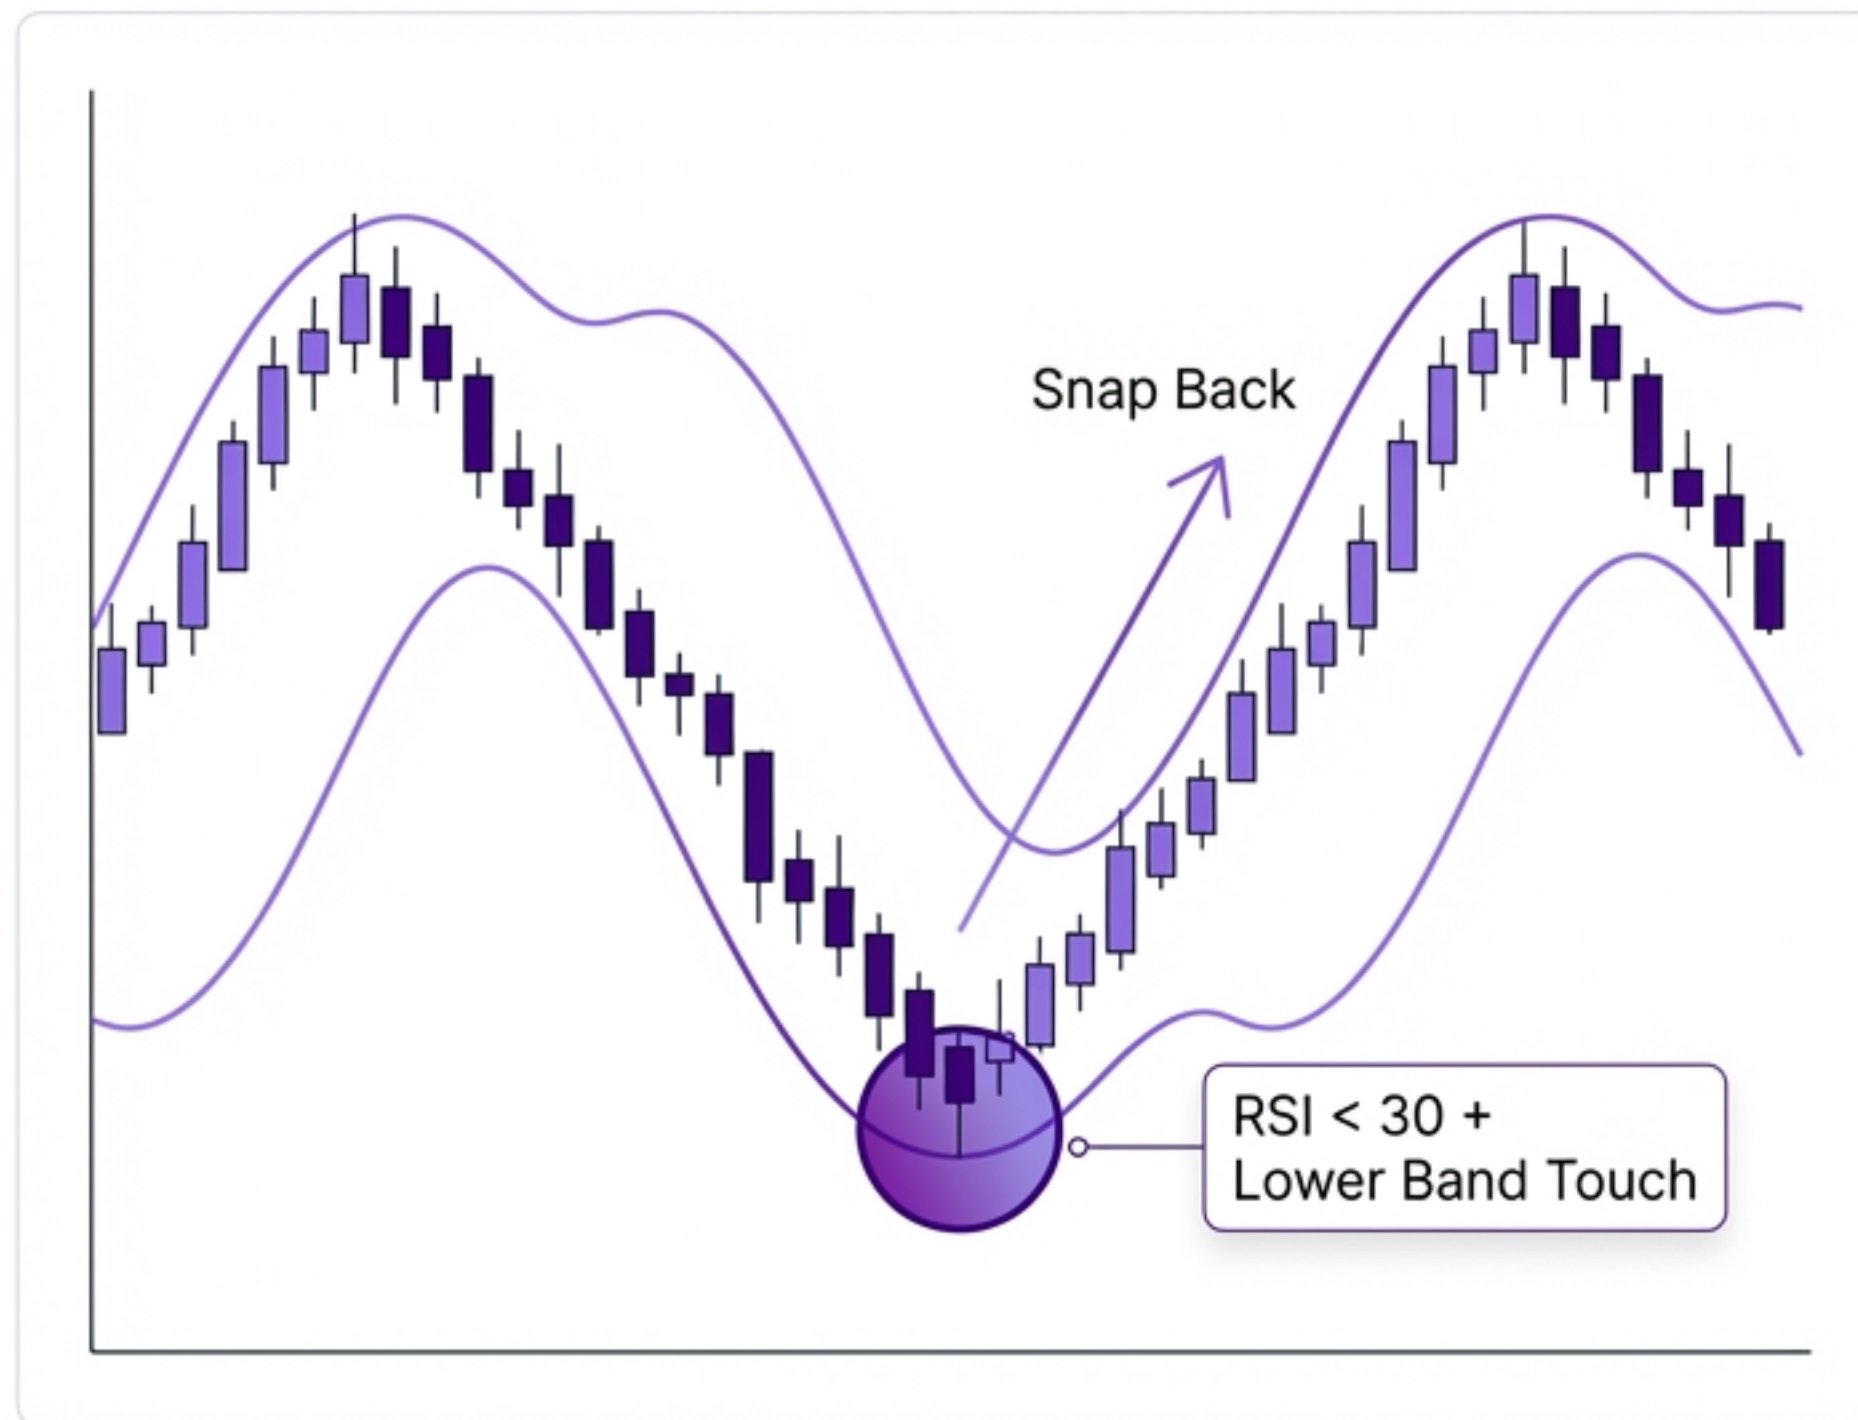

Identifies ETFs at extreme oversold levels primed for mean reversion bounces.

Scanner 3: Overbought Short

Spots overbought conditions for bear ETF entries or short-term profit taking.

Use Case:

Ideal for volatile, range-bound markets where trends are unclear.

SCANNER MASTERY: FLOW & ROTATION

Scanner 5: Volume Surge Detection

Detects unusual activity and institutional interest in leveraged products.

Scanner 6: Sector Rotation

Tracks money flow between sectors to position in leading leveraged ETFs before the crowd.

Scanner 7: Crypto Leveraged ETF

Specialized setups for Bitcoin, Ethereum, and Solana proxies.

Momentum needs a story institutions care about.

RISK MANAGEMENT IS NON-NEGOTIABLE

Position Sizing & Stop Loss Strategies

Stop Losses

- Tight stops are mandatory: 5-7% for 3x ETFs, 3-5% for 2x ETFs.

Position Sizing

- Volatility-adjusted sizing rules to prevent account blowouts.

Market Analysis: Knowing when NOT to trade is as important as knowing when to trade.
